What Is tenfold?

tenfold provides No-Code Identity Governance & Administration with faster time to value. We make sure that the right people have access to the right resources at the right time.

Advantages at a glance

All Systems

From Active Directory to Entra ID and third-party apps: Manage all IT systems through one automated platform with tenfold.

All Workflows

On/Offboarding, self-service, central reporting and regular audits. For all users, unstructured data and permissions.

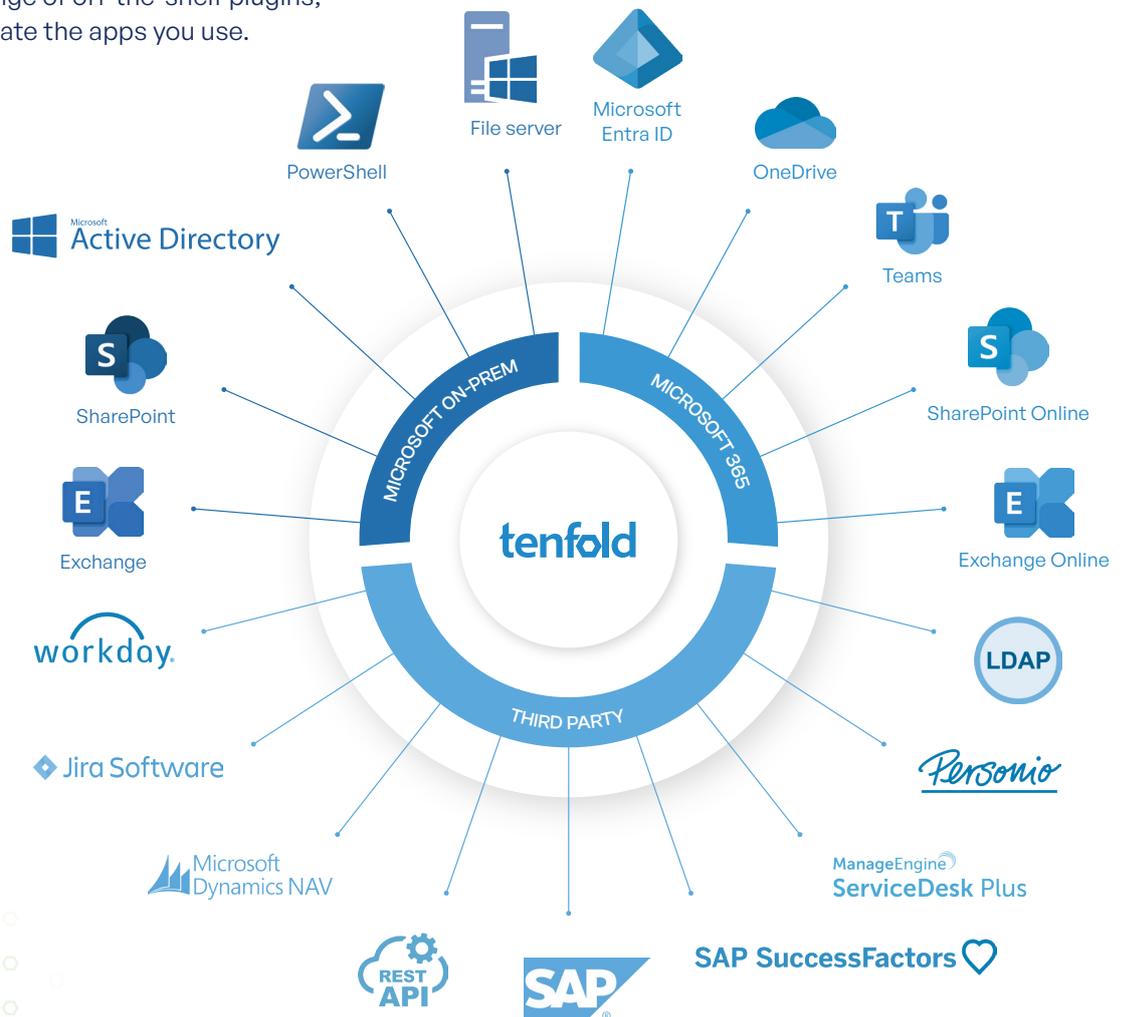

No-Code IGA

Prebuilt plugins and no-code configuration make tenfold quick and easy to deploy, use and maintain.

Out-of-the-Box Integration

tenfold includes a wide range of off-the-shelf plugins, allowing you quickly integrate the apps you use.

Competitive Comparison

	Data Governance Tools	Legacy IGA	tenfold
Features	✗ Limited feature set, no flexibility	✗ Excessive scope, highly complex	✓ Comprehensive governance, quick & easy
Setup	✗ Quick implementation due to limited scope	✗ Heavy customization, years of setup	✓ Up and running within weeks
Operation	✗ Low effort due to missing workflows	✗ High effort, needs team of specialists	✓ Can be managed by one person part-time
App Support	✗ No support for third-party apps	✗ Challenging, requires custom scripts	✓ Out-of-the-box support for your apps
Costs	✗ Inexpensive, but high hidden costs	✗ High initial costs, huge ongoing expenses	✓ Attractive pricing & inexpensive setup

Features

Lifecycle Management

Ensure the right level of access for every user with automated on/offboarding.

Role-Based Access

Set default privileges for users based on department, location or job function.

End User Self-Service

Free up your help desk with self-service access requests and custom approval workflows.

User Access Reviews

Regular audits by data owners remove unnecessary permissions and prevent data breaches.

In-Depth Reporting

Gain complete visibility into access rights from app-level down to folders and files.

Segregation of Duties

Prevent fraud and conflicts of interest by stopping users from holding conflicting privileges.

Watch the demo

www.tenfold-security.com/en/tenfold-demo

The screenshot shows the tenfold user interface. At the top, there is a search bar and a language selector set to 'English'. The main content area is titled 'Welcome to tenfold!' and includes a sub-header 'What would you like to do? Select option from the tiles below.' There are several interactive tiles for user actions: 'Change my password', 'Request resources for myself', 'Edit my person data', 'Edit my security settings', 'My requests', 'My recertifications', 'My substitutes', 'Create person', and 'Data Owner Area'. A 'Responsibility' section shows 'Temporarily locked AD users'. On the right, a 'Tasks' sidebar lists various security tasks with counts: Hardware Approvals (2), Software Approvals (1), File Servers Recertifications (6), File Servers Recertifications (46), My Activities (30), High Alerts (15), Expired resource assignments (0), Expiring persons (4), Locked persons (3), and Locked resource assignments (14). A large blue play button is overlaid on the center of the dashboard.
