What Is tenfold?

tenfold is the leading Identity and Access Management solution for mid-market companies. We make sure your users always get access to the data they need – but only for as long as they really need it.

Advantages at a glance:

All Systems

From Active Directory to Azure AD and third-party apps: Manage all IT systems through one automated platfrom with tenfold.

All Workflows

On/Offboarding, self-service, central reporting and regular audits. For all accounts, permissions and unstructured data.
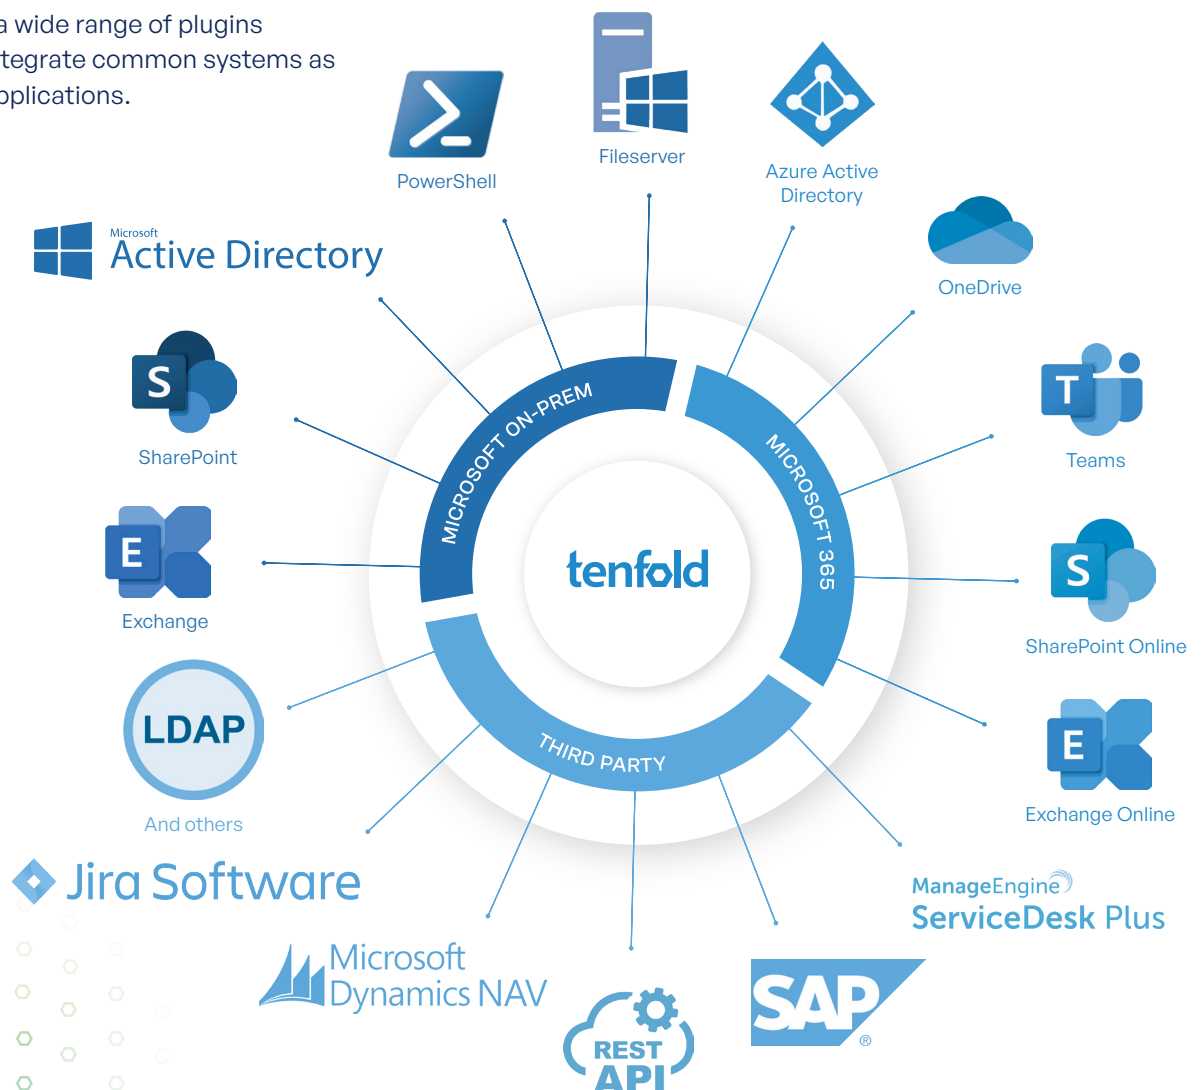

No-Code IAM

Prebuilt plugins and no-code configuration make tenfold quick and easy to deploy, use and maintain.

Integration

tenfold includes a wide range of plugins allowing you to integrate common systems as well as custom applications.

PowerShell

Fileserver

Azure Active Directory

OneDrive

Microsoft Active Directory

Teams

SharePoint

SharePoint Online

Exchange

Exchange Online

LDAP
And others

MICROSOFT ON-PREM

MICROSOFT 365

tenfold

THIRD PARTY

Jira Software

ManageEngine ServiceDesk Plus

Microsoft Dynamics NAV

REST API

SAP

Competitive Comparison

How does tenfold compare to data governance solutions aimed at small businesses on the one hand and enterprise solutions geared toward very large corporations on the other?

	Data Governance	Enterprise Solutions	tenfold
Features	✓ Limited management capabilities, zero flexibility	✗ Excessive scope, highly complex	✓ All-in-one solution for mid-market companies
Implementation Time	✓ No flexibility – short implementation time	✗ Difficult & lengthy months to years	✓ Up and running within weeks
Third-Party Support	✗ None	✗ Highly complex, custom programming required	✓ Easy integration with on-prem systems and the cloud
Costs	✗ Inexpensive at first glance, but considerable hidden costs	✗ High initial costs, soaring operational expenses	✓ Flexible subscription options & low implementation costs

Features

Identity & Access Management
Manage user accounts and access rights easily and securely.

Microsoft, Cloud & Third-Party
Easy integration with Microsoft® Active Directory, Microsoft 365, SAP® and other applications.

Generic Connector
Integrate tenfold with your custom applications using the REST-based Generic Connector.

User Access Reviews
Periodic reviews of access rights prevent privilege creep and help reduce risk of data breaches.

Change Tracking
Keep track of who has access to what, why and when at any time.

Self-Service & Data Owners
User self-service portal and approval workflows minimize IT workload.
